

# Indian Railways Institute of Civil Engineering (IRICEN)

## LEED India

## Certification Document

IRICEN obtained 61 points.

## Project Outline

Location	Pune
Number of floors	4
Total floor space	2,746 m <sup>2</sup>
Construction	2013
Application	Training centre

## Daikin Systems Installed

- Air conditioning systems  
**VRV** III heat pump type outdoor units x 23 (total 204 HP)
- Control systems  
intelligent Manager and BACnet interface

## Project Overview

The Indian Railways Institute of Civil Engineering (IRICEN) designed its administrative headquarters as a green building to reduce energy demand and optimise resource usage. The facility is also intended to spread awareness of environmental issues among Indian Railways engineers.

The building is actually utilised in the curriculum for trainee officers at IRICEN. Trainees gain an in-depth understanding of the showcase facility during their studies, helping them to promote green concepts throughout the country.
